SmartLink®

SIMPLE INTERFACE WITH POWERFUL CONTROL REDUCES LABOR & INCREASES WATER SAVINGS

SmartLink is a web application that provides you the tools to be one step ahead. Make controller program changes, manage flow, use the on-site inspection tools, receive email alerts, send global commands, the list goes on and on. SmartLink becomes an indispensable part of your work-flow.

Having mobile access using your tablets or smartphones means you're able to respond faster than before. Customers appreciate it, and water is saved in the process.

Reliable cellular networks ensure the connection is stable and our hosted cloud-servers ensure that your controllers are available when you need it.

Compatible with SmartLine Controllers
Excluding SL800.

Inspection Tool
More than a repair tracking tool.

Proposal Tool
Run your business without the paperwork.

Snapshot
Only takes one shot to save and store program.
